Watson's New Map of the United States.

NEW YORK:
GAYLORD WATSON,
16 BEEKMAN STREET.
1872.

TO THE PURCHASERS OF

WATSON'S NEW MAP OF THE UNITED STATES.

It has been our object in preparing this little manual, to furnish all without additional cost to you, though at heavy expense to ourselves, those general statistics which are likely to be wanted by a map purchaser. We think that we have succeeded in giving you the most valuable collection ever made in any moderate compass, and shall be greatly disappointed, if this does not largely increase the demand for our beautiful map. If the purchasers are satisfied with our effort to give them their money's worth, we shall be thoroughly content.

THE PUBLISHER.

Entered according to Act of Congress, in the Year 1872, by GAYLORD WATSON, in the Office of the Librarian of Congress, at Washington.

THE LEGISLATIVE BRANCH OF THE GOVERNMENT.

THE National Legislature consists of a Senate of two members from each State, making the full Senate now consist of seventy-four members, and a House of Representatives, now having two hundred and forty-five members. The Senators are chosen by the Legislatures of their several States, for a term of six years, either by concurrent vote or by joint ballot, as the State may prescribe. The members of the House of Representatives are usually elected by a plurality vote in districts of each State, whose bounds are prescribed by the Legislature, for the term of two years. In a few instances they have been elected at large: *i. e.*, by the plurality vote of the entire State.

The Constitution requires nine years' citizenship to qualify for admission to the Senate, and seven years to the House of Representatives. An act approved July 26, 1866, requires the Legislature of each State which shall be chosen next preceding the expiration of any Senatorial term, on the second Tuesday after its first meeting, to elect a successor, each House nominating *viva voce*, and then convening in Joint Assembly to compare nominations. In case of agreement, such person shall be declared duly elected; and if they do not agree, then balloting to continue from day to day at 12 M. during the session until choice has been made. Vacancies are to be filled in like manner. The members of each House receive a salary of $5,000 per annum, and mileage at the rate of twenty cents per mile. For each day's absence, except when caused by sickness, $8 per diem is deducted from the salary. The President *pro tem.* of the Senate receives the same compensation as the Vice-President. The Speaker of the House of Representatives receives double the salary of a member.

CONGRESSIONAL DISTRICTS.

The House of Representatives of the United States is composed of members elected by Districts. The number apportioned to the States has varied at each decennial census, as shown by the following Table:

Census.	When Apportioned.	Whole No. Rep.	Ratio, One to
	By Constitution	65	
1790	April 14, 1792	105	33,000
1800	Jan. 14, 1802	141	33,000
1810	Dec. 21, 1811	181	35,000
1820	March 7, 1822	212	40,000
1830	May 22, 1832	240	46,700
1840	June 25, 1842	223	70,680
1850	July 30, 1852	233	93 423
1860	April —, 1861	242	127,000

In the new apportionment for 1870, the basis of representation will probably be about one Congressman to every 155,000 of the population.

IMMIGRATION.

HOMESTEAD FOR SOLDIERS.

THE LAW, THE INSTRUCTIONS, AND THE BLANK FOR APPLICATIONS.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE, Aug. 8, 1870.

GENTLEMEN:—The following is the twenty-fifth section of the act of Congress, approved July 15, 1870, entitled "An act making appropriations for the support of the army for the year ending June 30, 1871, and for other purposes," viz.:

SEC. 25.—*And be it further enacted*, That every private soldier and officer who has served in the army of the United States during the rebellion, for ninety days, and remained loyal to the Government, and every seaman, marine, and officer or other person who has served in the navy of the United States, or in the marine corps or revenue marine during the rebellion, for ninety days, and remained loyal to the Government, shall, on payment of the fee or commission to any Register or Receiver of any Land Office required by law, be entitled to enter one quarter section of land, not mineral, of the alternate reserved sections of public lands along the lines of any railroads or other public works in the United States, wherever public lands have been or may be granted by acts of Congress, and to receive a patent therefor under and by virtue of the provisions of the act to secure homesteads to actual settlers on the public domain, and the acts amendatory thereof, and on the terms and conditions therein prescribed; and all the provisions of said acts, except as herein modified, shall extend and be applicable to entries under this act, and the Commissioner of the General Land Office is hereby authorized to prescribe the necessary rules and regulations to carry this section into effect, and determine all facts necessary thereto.

By these provisions the Homestead Law of 20th May, 1862, and the acts amendatory thereof, are so modified as to allow entries to be made by the parties mentioned therein, of the maximum quantity of one quarter-section, or 160 acres of land, held at the double minimum price of $2.50 per acre, instead of one-half quarter-section, or eighty acres as heretofore.

In case of a party desiring to avail himself thereof, you will require him to file the usual homestead application for the tract desired, if legally liable to entry, to make affidavit according to the form hereto annexed, instead of the usual homestead affidavit, and on doing so allow him to make payment of the $10 fee stipulated in the act of 20th May, 1862, and the usual commissions on the price of the land at $2.50 per acre, the entry to be regularly numbered and reported to this office in your monthly homestead returns.

Regarding settlement and cultivation, the requirements of the law in this class of entries are the same as in other homestead entries.

Very respectfully your obedient servant,

JOSEPH S. WILSON,
Commissioner, Register, and Receiver.

And every person who shall knowingly and intentionally aid or abet any person in the commission of any such felony, or attempt to do any act hereby made felony, or counsel, advise, or procure, or attempt to procure the commission thereof, shall be liable to indictment and punishment in the same manner and to the same extent as the principal party guilty of such felony, and such person may be tried and convicted thereof without the previous conviction of such principal.

NOTES TO THE FOREGOING TABLE.

a. The areas of those States marked *a* are derived from geographical authorities, the public surveys not having been completely extended over them.

b. The present area of Nevada is 112,000 square miles, enlarged by adding one degree of longitude lying between the 37th and 42d degrees of north latitude, which was detached from the west part of Utah, and also north-western part of Arizona Territory, per act of Congress, approved May 5, 1866 (U. S. Laws, 1865 and 1866, p. 43), and assented to by the Legislature of the State of Nevada, January 18, 1867.

NOTES TO THE FOREGOING TABLE—continued.

c. The present area of Utah is 84,476 square miles, reduced from the former area of 88,056 square miles by incorporating one degree of longitude on the east side, between the 41st and 42d degrees of north latitude, with the Territory of Wyoming, per act of Congress, approved July 25, 1868.

d. The present area of Arizona is 113,916 square miles, reduced from the former area of 126,141 square miles, by an act of Congress, approved May 5, 1866, detaching from the northwestern part of Arizona a tract of land equal to 12,225 square miles, and adding it to the State of Nevada. (U. S. Laws 1865 and 1866, p. 43.)

e. Nevada.—Enabling act approved March 24, 1864. (Statutes, vol. 13, p. 30.) Duly admitted into the Union. President's proclamation No. 22, dated October 31, 1864. (Statutes, vol. 13, p. 749.)

f. Colorado.—Enabling act approved March 21, 1863. (Statutes, vol. 13, p. 32.) Not yet admitted.

g. Nebraska.—Enabling act approved April 19, 1864. (Statutes, vol. 13, p. 47.) Duly admitted into the Union. See President's proclamation No. 9, dated March 1, 1867. (U. S. Laws 1866 and 1867, p. 4.)

h. That portion of the District of Columbia south of the Potomac River was retroceded to Virginia, July 9, 1846. (Statutes, vol. 9, p. 35.)

i. Boundaries.—Commencing at 54° 40′ north latitude, ascending Portland Channel to the mountains, following their summits to 141° west longitude; thence north on this line to the Arctic Ocean, forming the eastern boundary. Starting from the Arctic Ocean west, the line descends Behring Straits, between the two islands of Krusenstern and Romanzoff, to the parallel of 65° 30′, and proceeds due north without limitation into the same Arctic Ocean. Beginning again at the same initial point, on the parallel of 65° 30′, thence, in a course southwest, through Behring Strait, between the Island of St. Lawrence and Cape Choukotski, to the 172° west longitude, and thence southwesterly, through Behring Sea, between the islands of Alton and Copper, to the meridian of 193° west longitude, leaving the prolonged group of the Aleutian Islands in the possessions now transferred to the United States, and making the western boundary of our country the dividing line between Asia and America.

j. The present area of Dakota is 150,932 square miles, reduced from the former area of 240,597 square miles, by incorporating seven degrees of longitude of the western part, between the 41st and 45th degrees of north latitude, with the Territory of Wyoming, per act of Congress, approved July 25, 1868.

k. The present area of Idaho is 86,294 square miles, reduced from the former area of 90,932 square miles by incorporating one degree of longitude on the east side, between the 42d and 44th degrees of north latitude with the Territory of Wyoming, per act of Congress, approved July 25, 1868.

The average cost of Railroads in the United States, including the great overland lines which cost more than $100,000 per mile, or about 10 per cent. of the total cost of Railroads, is $47,277 per mile. But few of the great Eastern Trunk Roads have cost less than $80,000 to $100,000 per mile, while in the South the cost of Railroad building, no-

tably in the Atlantic States, has not exceeded $20,000 to $25,000 per mile.

The progress of Railroad construction in the United States since 1827, in which year the Granite Railroad, at Quincy, Mass., was inaugurated, to the present time, is shown in the following table:

EDUCATIONAL STATISTICS.

THE Public School statistics of the United States require a volume of themselves for their complete elucidation. We can only give aggregates of the most important items.

The number of children of school-age in 30 of the 37 States, in 1870, was 10,467,189. The number enrolled in 31 of the 37 States was 6,751,341. The average attendance in 24 out of 37 States, was 3,414,362. The number of schools in 29 States was 117,950. Nine States reported 320,000 children in private schools. In 30 States there were 181,574 teachers employed in the public schools; of these, 63,815 were male teachers, and 118,056 female teachers. Nevada paid the highest average salaries to both her male and female teachers, giving the former an average of $118.75 per month, and the latter $92.16, both in gold. North Carolina paid the smallest average to her male teachers—$20.50 per month—out of which they were required to pay $12, or thereabouts, for board. Maine paid the lowest wages to female teachers—$14 per month—though as this was in addition to the board, it was probably in reality higher than North Carolina or some of the other States.

In 25 States—all that reported—the average wages of male teachers were $51 per month, and of female teachers $33.12 per month.

The total annual income of the public schools in 31 States—embracing all except Georgia, Mississippi, Oregon, South Carolina, Texas, and Virginia, was nearly sixty-two millions of dollars. Of this immense sum, thirty-nine millions was raised in 24 States by taxation, nearly three millions was interest on permanent funds, and the remainder was derived from the sale of lands, rate-bills, and other sources.

The expenditures are divided into two classes, the one of current, the other of incidental expenditures. Under the first class come teachers' wages, fuel, &c. Under the second, the cost of sites, buildings, repairs, libraries, apparatus, and other objects.

The amount paid for teachers' wages in 22 States, in 1870, was $28,525,011.86. For fuel and insurance in 17 States, $4,567,307.97 was paid. In 25 States, $34,871,183.99 was paid for buildings, sites, and repairs. In 11 States, $424,000 was expended for libraries and apparatus.

The entire expenditure, reported from 30 States, is $58,018,371.48. Twenty-three States only report their school fund and its condition. The aggregate school funds of these States amount to $45,823,019,99. Sev-

eral of the States not reporting have large funds, and it is probably within bounds to estimate the present value of the school funds of all the States as not less than $65,000,000.

The following table shows the number of colleges and collegiate institutions, instructors and students, in each State in the Union.

Of scientific and professional schools in the United States, there are ninety-three *Theological Seminaries* having 384 instructors, and about 3,600 students; twenty-eight *Law Schools*, with 100 professors and about 1,800 students; fifty-nine *Regular Medical Schools*, with 440 or more professors, and about 7,000 students; five *Eclectic Medical Schools*, with about 35 professors and 325 students; one *Physio-Medical* or *Botanic School*, with 6 professors and 42 students; seven *Homœopathic*, with 65 professors and nearly 400 students; six *Dental Colleges*, with 39 professors and about 250 students; nineteen *Pharmaceutical Societies and Colleges*, with about 40 professors and perhaps 600 students. There are also eighty-two *Normal Schools* for the training of teachers, with about 230 teachers, and not far from 10,000 students; twenty-six *Agricultural and Scientific Schools*, and several others about to open, all largely endowed, and with about 200 professors and at least 2,000 students.

There are, moreover, 20 or more commercial or business colleges, giving a limited course of instruction generally only in topics relating to business. These have over 120 teachers and about 5,000 students.

There are 36 institutions for the instruction and training of deaf mutes, 22 for the blind, and 7 for the idiotic.

Of special schools and means of instruction, beside the Military Academy at West Point and the Naval Academy at Annapolis, there are very many. Most of our larger cities have one or more, many of them two or three Schools of Art, Academies of Design, and Schools of Instruction in Wood Engraving, Free Drawing, Water-color Painting, Architectural Drawing, and Sketching and Modeling from nature and life. Some of

them, like the Cooper Union in New York, the Peabody Institute at Baltimore, and the Stevens Institute at Hoboken, are magnificent foundations, and furnish opportunity for the highest free education in art matters. There are also numerous schools of higher instruction in music, with eminent teachers and a large attendance.

Special schools for instruction in navigation, surveying, mining, metallurgy, chemistry, and civil engineering are also becoming numerous.

Most of the Mercantile Library Associations have classes for the instruction of their members in modern language, mechanics, higher mathematics, etc., and many of the Young Men's Christian Associations have also established such classes.

There are 308 of the Young Men's Christian Associations, with an aggregate of about 53,000 members, and more than three-fourths of them have libraries, some of them of considerable size.

Aside from these, and from the college libraries, there are 161 Public Libraries in the United States, containing from 1,200 to 190,000 volumes in each. The largest of these are the Library of Congress, 190,000 volumes; the Boston Public City Library, about 140,000; the Astor Library, in New York, of about the same size; the Boston Athenæum, over 100,000; the Mercantile Library, in New-York City, about 120,000; the Philadelphia Library Company, about 85,000; the New York State Library, at Albany, nearly 80,000.

EXPENSES PER HEAD OF THE STATES FOR SCHOOL PURPOSES.

The United States Commissioner gives some very interesting figures in regard to the annual expenditure in each State, for each child of school age. In the list Nevada stands first, California third, and Connecticut fourth. But in Nevada and California, a large proportion of the expense is caused by the erection of new school-houses, so that the table gives these States a better standing than they are entitled to. Excluding these two, and Massachusetts stands first and Connecticut second.

The following is the table showing the expenditure per head of the school population, excepting seven States.

CONSTITUTION OF THE UNITED STATES.

WE, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution of the United States of America:

ARTICLE I.—CONGRESS.

SECTION I.—*Legislative Powers.*

1. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

SECTION II.—*House of Representatives.*

1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

Qualification of Members—Apportionment.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of *New Hampshire* shall be entitled to choose three, *Massachusetts* eight, *Rhode Island and Providence Plantations* one, *Connecticut* five, *New York* six, *New Jersey* four, *Pennsylvania*

eight, *Delaware* one, *Maryland* six, *Virginia* ten, *North Carolina* five, *South Carolina* five, and *Georgia* three.

4. When vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

SECTION III.—*Senate.*

1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof for six years; and each Senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year; so that one third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointments, until the next meeting of the Legislature, which shall then fill such vacancies.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President *pro tempore*, in the absence of the Vice-President, or when he shall exercise the office of President of the United States.

6. The Senate shall have the sole power to try all impeachments; when sitting for that purpose, they shall be on oath, or affirmation. When the President of the United States is tried, the Chief Justice shall preside, and no person shall be convicted without the concurrence of two thirds of the members present.

7. Judgment in cases of impeachment shall not extend farther than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment and punishment, according to law.

SECTION IV.—*Election of Members.*

1. The times, places, and manner of holding elections for Senators

and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.

2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

SECTION V.—*Powers of each House.*

1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner, and under such penalties, as each House may provide.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two thirds, expel a member.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secresy; and the yeas and nays of the members of either House on any question shall, at the desire of one fifth of those present, be entered on the journal.

4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

SECTION VI.—*Compensation, Privileges, Etc.*

1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall, in all cases, except treason, felony and breach of peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House, they shall not be questioned in any other place.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States, shall be a member of either House during his continuance in office.

SECTION VII.—*Bills and Resolutions, Etc.*

1. All bills for raising revenue shall originate in the House of Repre-

sentatives: but the Senate may propose, or concur with amendments, as on other bills.

2. Every bill which shall have passed the House of Representatives and the Senate, shall, before it become a law, be presented to the President of the United States; if he approve he shall sign it, but if not he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If, after such reconsideration, two thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall, likewise, be reconsidered; and if approved by two thirds of that House, it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return, in which case it shall not be a law.

3. Every order, resolution, or vote, to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment,) shall be presented to the President of the United States; and before the same shall take effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the rules and limitations prescribed in the case of a bill.

SECTION VIII.—*Powers of Congress.*

1. The Congress shall have power to lay and collect taxes, duties, imposts and excises to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts and excises, shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish a uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post roads.

8. To promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offenses against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections and repel invasions.

16. To provide for organizing, arming and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States, respectively, the appointment of the officers and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation, in all cases whatsoever, over such district (not exceeding ten miles square) as may, by cession of particular States, and the acceptance of Congress, become the seat of the Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings; and,

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or office thereof.

SECTION IX.—*Prohibitions and Privileges.*

1. The migration or importation of such persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the year 1808, but a tax or duty may be imposed on such importation, not exceeding ten dollars on each person.

2. The privilege of the writ of *Habeas Corpus* shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

3. No bill of attainder or expost facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration herein before directed to be taker.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another; nor shall vessels

bound to, or from, one State, be obliged to enter, clear, or pay duties in another.

7. No money shall be drawn from the Treasury but in consequence of appropriation made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

8. No title of nobility shall be granted by the United States; and no person holding any office of profit or trust under them, shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever, from any king, prince, or foreign state.

SECTION X.—*State Restrictions.*

1. No State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisal, coin money, emit bills of credit, make any thing but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any imposts or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty on tonage, keep troops, or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.—PRESIDENT.

1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and together with the Vice-President, chosen for the same term, be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of Electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or person holding an office of trust or profit under the United States, shall be appointed an Elector.

3. [The electors shall meet in their respective States, and vote by ballot for two persons, of whom one, at least, shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each; which list they

shall sign and certify, and transmit sealed to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed; and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.]

[*This clause altogether altered and supplied by the XII. Amendment.*]

4. The Congress may determine the time of choosing the Electors, and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person, except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States.

6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly, until the disability be removed, or a President shall be elected.

7. The President shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States or any of them.

8. Before he enter on the execution of his office, he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

SECTION II.—*Powers of the President.*

1. The President shall be commander-in-chief of the army and navy of the United States, and of the militia of the several States, when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offenses against the United States, except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session.

SECTION III.—*Duties of the President.*

1. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and, in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

SECTION IV.—*Impeachment of Officers.*

1. The President, Vice-President, and all civil officers of the United States, shall be removed from office on impeachment for, and conviction of, treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.—JUDICIARY.

SECTION I.—*Courts—Judges.*

1. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from

time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation which shall not be diminished during their continuance in office.

SECTION II.—*Judicial Powers—Civil—Criminal.*

1. The judicial power shall extend to all cases in law and equity, arising under this Constitution, the laws of the United States, and treaties made, or which shall be made under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States—between a State and the citizens of another State—between citizens of different States—between citizens of the same State claiming lands under grants of different States—and between a State, or the citizens thereof, and foreign States, citizens or subjects.

2. In all cases affecting ambassadors, other public ministers and consuls, and those in which a State shall be a party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned, the Supreme Court shall have appellate jurisdiction, both as to the law and fact, with such exceptions, and under such regulations as the Congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury; and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State, the trial shall be at such place or places as the Congress may by law have directed.

SECTION III.—*Treason.*

1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood, or forfeiture, except during the life of the person attained.

ARTICLE IV.—STATE RIGHTS.

SECTION I.—*Restitution and Privileges.*

1. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof.

SECTION II.—*Privilege of Citizens.*

1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

3. No person held to service or labor in one State under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

SECTION III.—*New States.*

1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State; nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States, and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

SECTION IV.—*State Governments—Republican.*

1. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion; and on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.—AMENDMENTS.

1. The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution when ratified by the Legislatures of three fourths of the several States, or by conventions in three fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year 1808 shall in any manner affect the first and fourth clauses in the ninth section of the first article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.—Debts.

1. All debts contracted, and engagements entered into, before the adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the confederation.

2. This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound, by oath or affirmation, to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.—Ratification.

1. The ratification of the conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

Done in Convention, by the unanimous consent of the States present, the seventeenth day of September, in the year of our Lord, one thousand seven hundred and eighty-seven, and of the Independence of the United States of America, the Twelfth.

In witness whereof, we have hereunto subscribed our names.

GEORGE WASHINGTON,

President, and Deputy from Virginia.

Attest:

Wm. Jackson, *Secretary.*

[NOTE.—The eleventh article of the amendments to the Constitution was proposed at the Second Session of the Third Congress; the twelfth article, at the First Session of the Eighth Congress; and the thirteenth article at the Second Session of the Eleventh Congress.]

Article XIII.

Neither slavery nor involuntary servitude, except as a punishment for crime, whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

Article XIV.

SECTION 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States, and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

SEC. 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and

Vice-President of the United States, representatives in Congress, the executive and judicial officers of a State, or the members of the legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

SEC. 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may, by a vote of two thirds of each House, remove such disability.

SEC. 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

SEC. 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

Article XV.

SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States, or by any State, on account of race or color, or previous condition of servitude.

SEC. 2. The Congress shall have power to enforce this article by appropriate legislation.
